PROFILE SUMMERY:-

- Power BI Developer and Administrator with 3.2+ Years of experience in both development and administration of enterprise-level BI solutions.
- Adapt at designing and deploying interactive dashboards, reports, and data models using Power BI, DAX, Power Query, and SQL
- Skilled in transforming complex business requirements into actionable insights that drive strategic decision-making.
- Experienced in administering Power BI environments, including workspace management, user access control, data gateway configuration, and enforcing governance and compliance policies.
- Proven ability to manage tenant-level settings, monitor performance and ensure secure, scalable BI operations across organizations.

TECHNICAL SKILLS: -

- Development: Power BI Desktop, DAX, Power Query, Data Modeling, SQL, ETL, Report Optimization
- Administration: Power BI Service, Workspace & Access Management, Data Gateway Setup, Security & Compliance, Azure Active Directory, Monitoring & Governance
- Tools & Platforms: Azure Data Services, Excel, SharePoint, Microsoft Fabric, Power Platform

PROFESSIONAL EXPERINCE: -

Capgemini, Mumbai — Power BI Developer and Administrator

Duration: [May 2022- Present]

Key Responsibility & Achievements:

- Gather and analyzed business requirements to design and develop interactive dashboards and reports.
- Create data models using Power BI Desktop with optimized DAX measures and calculated columns.
- Perform data transformation using Power Query and integrate data from multiple sources (SQL Server, Excel, Azure, APIs)
- Collaborate with business stakeholders to define KPIs and metrics for performance tracking.
- Optimize report performance and ensure data accuracy and consistency.
- Implement row-level security (RLS) to control data access based on user roles.
- Manage Power BI Service including workspace creation, user access, and content deployment.
- Configure and maintain on-premises data gateways for scheduled data refreshes.
- Monitor usage metrics, performance, and audit logs to ensure platform health and compliance.
- Enforce governance policies, including naming conventions, data classification, and sharing rules.
- Coordinate with IT and security teams to manage tenant settings and Azure Active Directory integration.
- Reduced report load time by 40% through DAX optimization and efficient data modeling.
- Collaborated with Network Security and Wintal teams to integrate Power BI into secure workflows.
- Utilize Power BI REST APIs to automate the extraction of metadata related to workspaces, datasets, reports, and pipelines.
- Develop scripts to collect and analyze data source details, including connection types, refresh schedules, and gateway configurations.

Certification:

- Microsoft Certified: Power BI Data Analyst Associate (PL-300)

EDUCATION: -

Sanjay Bhokare Group of Institutes (SBGI), Miraj

Bachelor of Technology (B.Tech) in Electrical Engineering -2021

Percentage: 80.75
